

Oak Hill's Race to Space!

Join **K.R.A.T.E.R**, also known as Kidstop's research, aeronautics training and exploration readiness, for an out of this world space camp. Each day of the week we will be learning about a different space related topic. If you attend one training (rotation) a day, you will receive a stamp toward your space graduation. The completion of the camp, receiving five stamps, will result in an extraterrestrial reward.

Monday

Today's trainings will be all about the moon. Not just Earth's moon but the other planets', too!

Did you know? The Earth, seen from the moon, also goes through phases. They are the exact opposite of the lunar phases we see on Earth.

Tuesday

Today's trainings will be all about the solar system we live in. We'll also learn about the other planets!

Did you know? For thousands of years humans were unaware of the solar system and believed that Earth was at the center of the Universe.

Wednesday

Today's trainings will be all about spaceships and rockets. Get ready for liftoff!

Did you know? It takes only 8 minutes for the space shuttle to accelerate to a speed of more than 17,000 miles per hour.

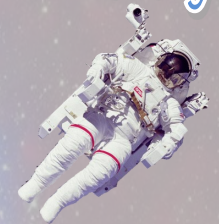

Thursday

Today's trainings will be all about the Milky Way galaxy. This is one Milky Way you can't eat!

Did you know? The Milky Way contains over 200 billion stars, and enough dust and gas to make billions more.

Friday

Today's trainings will be all about astronauts. We'll learn what it takes to walk in space!

Did you know? The word "astronaut" comes from the Greek words "astron nautes", which means "star sailor."
